

Tricycle⁴⁰⁵

winther®

A Danish Design Icon

Since 1953 several million children have been whizzing around on the Winther Tricycle⁴⁰⁵. It is developed with a focus on safety and quality and is a true Danish design icon made to last for generations. A favorite among children.

A GIFT TO THE IMAGINATION – RIDE THE WORLD

Learning to ride a bike is a very important part of children's development. It improves their motor and balance skills but a Winther Trike⁴⁰⁵ does more than that. It also stimulates the imagination and adds a lot of play value. Bring the favorite teddybear along for a ride to fairy tale land. Or fill the tipping tray with water and become the firefighter who saves the playhouse. Fits children between 1-4 years.

Winther Tricycle⁴⁰⁵ is a true Danish design icon developed in 1953. It is designed based on a desire to create a bike that offers your child more than a first riding experience. It is built to encourage movement, develop motor skills and stimulate play in its simple form. The best start to a confident childhood.

BUILDS CONFIDENCE

Pedals are finally turning, feet operate in coordinated moves for the first time. The Winther tricycle⁴⁰⁵ sets in motion. Surprised and happy, your child looks up and smiles proudly. A new milestone reached. Your child's first bike ride. The adventure has only just begun...
